

DIAMONDBACK

INDUSTRIAL FINISHES

CORE CAPABILITIES STATEMENT

We provide precision surface preparation and coating services for high-performance metals used in aerospace, defense, and industrial applications. Our in-house capabilities include:

ABRASIVE BLASTING

- + Aluminum oxide and garnet blasting
- + Controlled surface profiling for adhesion and cosmetic finishes
- + Capable of handling large parts in the blast booth, accommodating dimensions up to 11.5' high, 13.5' wide, and 40' long.

POWDER COATING

- + Multiple color, texture and primer options available
- + High-durability, corrosion resistant coatings for aluminum, carbon steel, and stainless steel
- + Controlled curing with calibrated ovens and temperature monitoring
- + Capable of handling large parts in the blast booth, accommodating dimensions up to 9.5' high, 9.5' wide and 38' long

ANODIZING

- + Type II and Type III anodizing for aluminum
- + Black and clear anodizing finishes
- + Surface corrosion and wear protection for high-performance applications
- + Post-anodize seal treatments for enhanced durability and surface protection

CERAKOTE APPLICATION

- + High-temperature and corrosion-resistant finishes for aluminum, steel, titanium and Inconel
- + Small-batch or production-scale application capabilities
- + Multiple color and sheen options available, including metallic finishes
- + In-house curing ovens for consistent finish quality

INDUSTRIES SERVED

- + Aerospace & Spaceflight
- + Defense Systems & Firearms
- + Industrial Equipment & Tooling
- + Marine & Boat Work - including boat towers, airboats, mud boats, and related components
- + Off-Road & Recreational Vehicle, side-by-sides, trailers, specialty equipment and more

FACILITIES & EQUIPMENT

- + 37,000 sq. ft. clean coating facility
- + In-house blasting, anodizing, powder coating, and Cerakote - Complete surface prep to finish under one roof
- + Two-shift operation totaling 20 hours per day, Monday to Thursday, with Friday availability for urgent or flexible scheduling
- + Ability to recommend optimal coating systems for corrosion resistance, wear, and appearance
- + Specialized capability to sandblast and powder coat oversized components that most shops cannot accommodate
